Preparation and distribution Of Hand sanitizer

Objectives:-

As we are facing a global health crisis by the Corona Virus Disease (COVID-19), it was our objective to extend our helping hands to those who give frontline service to the community. Based on this, we have decided to prepare and distribute hand sanitizer to students, staff, and community.

Report:-

Given the threat raised by the CORONA virus, Teachers of the Dept. of Chemistry decided to prepare and distribute hand sanitizer to the deserved ones in the nearby locality. Under the supervision of Dr. Makarand Choudhari, Head Department of the Chemistry, the teachers as well as the students of the Department, prepared isopropyl alcohol-based sanitizer sticking to the existing standard procedures and then filled in small (100 ml) bottles.

The sanitizer distribution was officially inaugurated on 17/03/2020 by the College Principal Dr. Prashant Chaudhari by giving the first sanitizer bottle to Hon. Adv. Milindji Patil (Secretary T.P.C.T.Yeoti). Dr. Abhay Sahapurkar delivered the felicitation speech on the occasion. After that Sanitizer bottles were distributed to the College students, staff, and local community. On the same day, sanitizer bottles were supplied to the administrative staff of our college.

Leaflets explaining the basic precautions to be taken against the Pandemic were also distributed along with the sanitizer bottles. The College Principal Dr. Prashant Choudhari has rendered full support for the successful execution of this extension activity to the nearby community and she wholeheartedly joined with the teachers while supplying the sanitizer.

Procedure Adopted for Preparation of Sanitizer

There are two main types of hand sanitizers: alcohol-based and alcohol-free. Alcohol-based hand sanitizers contain varying amounts and types of alcohol, often between 60% and 95%, and usually isopropyl alcohol, ethanol (ethyl alcohol), or n-propanol. Alcohol is known to be able to kill most germs. Here we have taken Isopropyl alcohol as the base and the other ingredients include, Hydrogen Peroxide, Aloe vera gel, and appropriate odouring agents.

Corona virus (COVID-19), the new name for the disease being caused by the recent corona virus, SARS-CoV-2 is all over the news. A lot of information is being presented about how help prevent Corona virus (COVID-19) from affecting you and your family. Perhaps the most important thing to know is that medical experts agree on this: One of the best ways to stay healthy is to wash your hands with hand sanitizer.

When shopping for hand sanitizer, make sure you choose a sanitizer that contains between 60-95% alcohols. Also, when you use hand sanitizer, make sure you do so the right way. Alcohol is effective at killing different types of microbes, including both viruses and bacteria, because it unfolds and inactivates their proteins.

This process, which is called denaturation, will cripple and often kill the microbe because its proteins will unfold and stick together. Since the outbreak of COVID-19, sales of hand sanitizers have soared. It's become such a sought-after product that pharmacies and supermarkets have started limiting the number that people can buy at one time. Though hand sanitizers can help reduce our risk of catching certain infections, not all hand sanitizers are equally effective against corona virus.

There are two main types of hand sanitizers: alcohol-based and alcohol-free. Alcohol-based hand sanitizers contain varying amounts and types of alcohol, often between 60% and 95% and usually isopropyl alcohol, ethanol (ethyl alcohol) or n-propanol. Alcohol is known to be able to kill most germs.

Alcohol-free hand sanitizers contain something called quaternary ammonium compounds (usually benzalkonium chloride) instead of alcohol. These can reduce microbes but are less effective than alcohol.

Not only are alcohol-based hand sanitizers found to be effective at killing many types of bacteria, including MRSA and *E coli*, they're also effective against many viruses, including the influenza A virus, rhinovirus, hepatitis A virus, HIV, and Middle East respiratory syndrome corona virus (MERS-CoV)

Alcohol attacks and destroys the envelope protein that surrounds some viruses, including corona viruses. This protein is vital for a virus's survival and multiplication. But a hand sanitizer needs to be at least 60% alcohol in order to kill most viruses.

Hand sanitizers with less than 60% alcohol were also found to be less effective at killing bacteria and fungi and may only reduce the growth of germs rather than killing them outright.

Alarm over corona virus has caused a run on hand sanitizers. And now, sanitizers from Purcell and other brands are exceedingly hard to come by. Where it isn't sold out, enterprising sellers are charging outrageously inflated prices simply because they can. If you don't have any hand sanitizer, you're not likely to get some while the manufacturers create enough supply to meet the frenzied demand caused by panic over corona virus.

The present scenario created a huge scarcity of sanitizers in the market which made a panic situation among the people. And it's really hard if it's not available in a place where people meet. Likewise the situation in our college. In order to overcome the situation in our college, and to distribute it among the people inside our college.

BLOOD DONATION CAMP

20/01/2021

A Blood Donation Camp was organized by NSS Unit, Venkatesh Mahajan Senior College Osmanabad in association with Hedgewar Blood Bank Solapur on a occasion of international Youth day (Birth Anniversary of Swami Vivekanand and Rashtra Ma Jijau) in college campus. The camp began at 9:00 A.M with a short inaugural function by Chief Guest of the Blood Donation Camp, honorable Chairman Adv. Milindji Patil Saheb and Principal Dr. Prashant Chadhari expressed his gratitude to the NSS unit of the College for its continuous endeavor in this regard. Principal Dr. Prashant Chadhari encouraged all the donors by saying "Gift of Blood is Gift of Life". He thanked all the donors for the Noble steps they have taken and to help the fellow brethren and he also stressed on the growing need of blood in the state and commended the young volunteers for their noble act. Dr. Makarand Choudhari, NSS Program Officer addressed the gathering, Blood cannot be manufactured - it only comes from generous donors to save the society and mankind, we should come forward for this Noble cause. 25 units of blood were donated by both students and the staff members of our Educational Institution. It is a way of Venkatesh Mahajan Senior College gesture in bringing a ray of hope to alleviate the serious problems of acute shortage of blood. India faces a blood shortage of 3 million units. The problem can be addressed if an additional two percent of Indians donate blood, as opened by the Health experts. We need 12 million units of blood every year but just about nine million units are being donated. Our College has been religiously organizing blood donation camps every year and students and the faculty members Sree Sachin Mahajan, Dr. Mahadev Harge come forward voluntarily to donate blood. While addressing first time donors at the camp our NSS volunteers brought awareness in them about shortage of blood and why we must donate blood every year, to help the persons requiring blood. Blood donation can save lives of innumerable persons. Donation of blood is very critical and crucial for saving lives many patients and those who have met with accidents. It is as such a great service or contribution to the society and people living in it.
